Attaching the Quilt to the Frame

Posted On Mar 03, Posted by sally Category General Quilting

Today we'll be talking a little about how to put your fabric on your frame, especially how to do it so that your top layer won't get distorted as you quilt.

There are three basic layers of fabric to a quilt, the top, the batting, and the backing.

At the beginning, make sure that each piece of your fabric is cut straight.

If possible, make the backing layer 4-6 inches wider and 6-10 inches longer than the top layer. This is done so that the backing is always the giver to the top.

Start by marking the center of each piece of fabric on the top and bottom edges. Also mark the center of your cloth leaders. Begin pinning you fabric to your cloth leaders, starting from the center marks you made, and pinning your way out towards the edges.
